

## TAILOR MADE HEALTH SCREENING

# What is included?

Your selection of screening tests is tailored to your needs based on your age, gender, lifestyle, personal and family medical history. After you've received your full results report, you'll receive a further consultation with a personal Bluecrest GP over the phone (or via skype) to decide on any follow-up action required. Ongoing free private GP access is also provided and online results are available via Android and Apple allowing staff to monitor health changes over time. There are many hundreds of combinations of screenings possible via this premium service, but one thing remains the same - you will receive more than the standard "Health MOT" package with a highly personal service of relevant, high-quality checks backed up with ongoing GP support.
