

TAILOR MADE HEALTH SCREENING

What is the benefit?

Regular health assessments can help determine your wellbeing, reduce the risk of future illness and can help detect diseases earlier. By identifying any potential risks or problems, you can address these and help stay in top condition both mentally and physically. You will have a thorough screening with a healthcare professional (at one of Bluecrest's 1,762 mobile clinics) and receive a detailed results report in the post. You can also access your results online and via the Bluecrest mobile app. What's more with the Tailor Made booking system your tests are uniquely selected for you based on your age, gender, lifestyle , personal and family medical history.
